

# SX-10

## Getting Started

Thank you for purchasing a XenData SX-10 LTO Archive Appliance. Please first check the contents of the box:

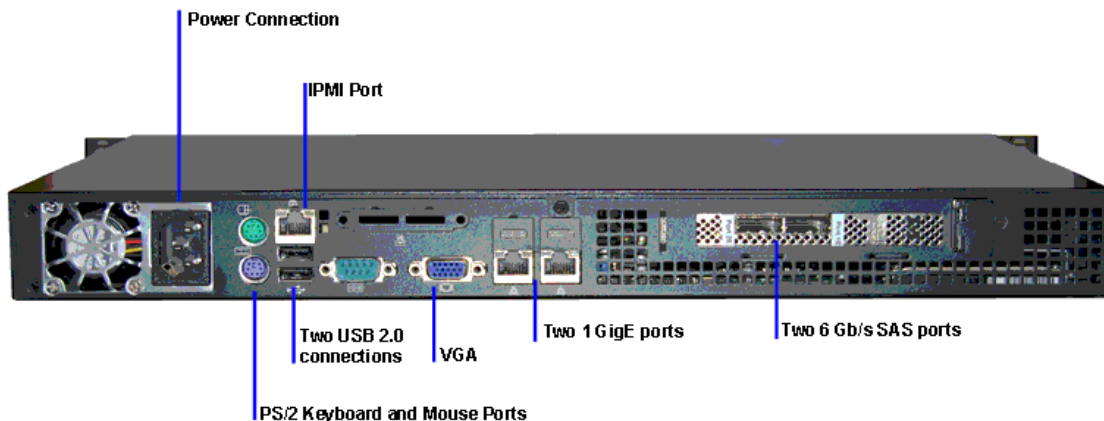

### Contents

- \* 1U SX-10 Archive Appliance
- \* power cord
- \* SX-10 CD with documentation and client software
- \* Windows 7 Professional DVD
- \* rack-mount screws
- \* feet for desktop use

In addition, you will need a supported LTO tape drive or tape library, SAS cable(s), at least one LTO tape cartridge and a network connection to the Internet.

# XenData SX-10 Getting Started Guide

## Connecting the Hardware and Configuring the Appliance

Please refer to the SX-10 Installation and Users Guide on the SX-10 CD for step by step instructions on connecting the hardware and configuring the system. It is also available from [www.xendata.com/support/SX-10/](http://www.xendata.com/support/SX-10/). The Installation and Users Guide is available in two formats: print format and a format suitable for small format devices such as a Kindle.

If you have an Internet connection and would like XenData Support to connect to your system and perform the configuration, please contact us to arrange a time. Contact details are given below.

### Using the System

Please refer to the SX-10 Installation and Users Guide, the XenData6 Server Administrator Guide and the XenData Alert Module Administrator Guide - these are on the SX-10 CD in both print and small device formats.
